Compact One-Touch Fittings

Construction

FEATURES

- Ideal for pneumatic connections specifically for small and compact equipments.
- Aesthetically pleasing nickel-plated metallic standardized feature for all applicable compact fittings.

Specifications

Applicable fluid Type	AIR(No other type of gas or liquid)	
Working Pressure range	0~150 PSI	0~9.9kgF/cm ² (0~990KPa)
Negative Pressure	-29.5 in Hg	-750mm Hg(10 Torr)
Working temperature Range	32~140°F	0~60°C

Stop Fittings

Construction

FEATURES

- Flow of air is completely stopped upon disconnecting the tube and reinstated upon reconnecting the tube.
- Dual-passage mechanism allows the pressure source to be originated from either side of the pneumatic connection.
- Ideal for pneumatic applications where tubing connections are frequently re-arranged.
- Suitable for experimenting, testing, demonstrating, and educating various pneumatic applications.

Specifications

Applicable fluid Type	AIR (No other type of gas or liquid)	
Working Pressure range	0~150 PSI	0~9.9kgF/cm ² (0~990KPa)
Negative Pressure	-29.5 in Hg	-750mm Hg (10 Torr)
Working temperature Range	32~140°F	0~60°C

Check Valves

Construction

FEATURES

- Uni-directionality of airflow is maintained while the flow of air in the opposite direction is completely prevented.
- Constant input and output air pressure is achieved due to the controlled directionality of airflow.
- Suitable for the pneumatic applications under low operational pressure conditions.

Specifications

Hand Valves

Construction

FEATURES

- The source of pressure can be completely shut off by simply turning the knob.
- Three-way directional control configuration releases the residual internal pressure on the output side when manually closed.
- Ideal for inspecting or repairing any devices without compromising the safety.
- Directionality of airflow may be selected from the tubing or threaded input side to the tubing or threaded output side.

SPEED CONTROLLERS

Construction

FEATURES

- Accurate regulation of an optimal airflow rate for precise motion control.
- Compact and space-saving configuration provides a functionally wide range of airflow rates.
- Available in control method type for metering of unidirectional airflow either entering into or exhausting out of a driving device.

Polyurethane Tube

Construction

FEATURES

- Exceptional flexibility allows a lower degree of tubing curvature radius.
- Durable, light weight, abrasion resistant, chemical resistant, and cost-effective.
- Ideal for pneumatic connections in low ambient temperature conditions.
- Self-retracting and self-storing coil tube characteristics with excellent memory.

APPLICATIONS

- Robotics
- Air tools
- Pneumatic systems
- Analytical Instrumentation

Specifications

Applicable fluid Type	AIR (No other type of gas or liquid)	
Working Pressure range	0~150 PSI	0~9.9kgf/cm ² (0~990KPa)
Negative Pressure	-29.5 in Hg	-750mm Hg (10 Torr)
Working temperature Range	32~140°F	0~60°C
